You are an automotive engineer in training at Montgomery College’s Engineering Department. You have been asked to design a land vehicle. You can be as creative as you like with your design, as long as it meets the following criteria:

- It must have at least two doors (with door handles)
- It must have front and rear wind shields
- It must have four wheels (could be designed using the revolve feature in ProE)
- It must have two rear-view mirrors
- It must have front and back lights

Everything else is up to you.

The entire training class will vote on the winning design, to be printed using our 3-D printer!!

Have Fun
